Period Covered: July 1, 1984 to June 30, 1985

ABSTRACT

This report presents 1984 findings from an annual survey providing statewide estimates of Alaska sport fishing effort and harvests by fisheries, areas, regions, and species. The survey indicated that 335,608 anglers took 882,744 trips and fished 1,866,837 days to harvest 3,150,795 fish in 1984. All are record highs. The methodology of the survey, based primarily on mailing questionnaires to a sample of licensees, continued to prove effectual.

KEY WORDS

Harvest, catch, fish, sport, recreation, Alaska, statewide, effort, use, fishermen, angler-days.

BACKGROUND

Meeting public demand for recreational fishing opportunities in Alaska while at the same time maintaining and protecting the fishery resources has become increasingly complex. In the early years of statehood--before rapid population expansion and industrial development--good, uncrowded sport fishing was accessible; large sport fisheries were few and easily monitored; and sport fishing was considered to be a minor factor in management of commercially exploited species.

Today along with increasing tourism and forest, mineral, petroleum, and associated government development has come a mushrooming recreationally-oriented population. Accessible sport fisheries have become crowded, new fisheries have developed, and pressure from a large mobile population is spilling ever farther afield. Native land allotments, (d)(2) national

interest land legislation, the issue of subsistence, state legislated land conveyance quotas, and problems of access have complicated maintenance and expansion of sport fishing opportunities. The State and private corporations have made substantial commitments to aquaculture and hatchery propagations. Also, recreational fishing is now a significant factor in total fisheries management, especially in Cook Inlet where vociferous sport-commercial-subsistence user conflicts have developed.

Against this backdrop, a statewide data base providing information on where sport fishing occurs, the extent of participation, the preferences of participants, and the species and numbers of major game fishes being harvested is essential for regulation and management of Alaska's sport fisheries and for total regulation, management, and allocation of multiple-use fisheries. In addition, this information is needed for establishing priorities; for formulating policies; for planning and evaluating rehabilitation, enhancement, hatchery, stocking, habitat protection, and access acquisition projects; for stock assessment; for forecasting; for gauging the economic and social significance of sport fishing; and for satisfying requests for information from individuals, special interest groups, government agencies, and the recreational industry.

Because of Alaska's vastness, meeting all these data requirements statewide by on-site creel censuses would be prohibitively costly, thus an economical supplementary program has been developed. Described herein are results from the eighth year of that program.

Species covered are listed in Table 2, Appendix A. Alaska sport fishing regulatory and management areas are delineated on the map in Figure 1, Appendix A.

RECOMMENDATIONS

1. Refine and continue to evaluate the methodologies developed to estimate statewide sport fish effort and harvests.
2. Continue to provide statewide estimates of effort and harvest for major Alaskan sport-caught species by area and fishery.

OBJECTIVE

1. To provide statewide estimates of effort and harvest for major Alaskan sport-caught species by area and fishery.

TECHNIQUES USED

The Alaska statewide sport fish harvest program combines postal surveys and creel censuses to obtain estimates of effort and harvest by fishery and by species. The postal surveys consist of repeated mailings of questionnaires

to random samples of Alaska sport fishing license holders. Creel censuses consist of on-site interviews of random samples of sport fishermen. The postal surveys provide estimates for all fisheries, while creel censuses of major selected fisheries provide validity correction and check.

The 1984 harvest survey consisted of a mailing of 12,264 questionnaires, followed by two reminders to nonrespondents (examples of the questionnaire and reminders are in Appendix B). Otherwise, techniques used were the same as described by Mills (1979).

FINDINGS

Results

The Alaska Sport Fish Harvest Survey indicated that 335,608 anglers took 882,744 trips and fished 1,866,837 days to harvest 3,150,795 fish in 1984. All are record highs and represent increases of 8% in anglers, 8% in days, and 2% in fish over 1983, in which 309,998 anglers fished 1,732,528 days to harvest 3,086,280 fish.

Of the 335,608 anglers who fished in 1984, 237,381 (71%) were Alaska residents while 98,227 (29%) were nonresidents. This represents a 6% increase in resident anglers and a 15% increase in nonresident anglers over 1983, in which there were 224,269 (72%) residents and 85,729 (28%) nonresidents. Since 1977, the first year of the survey, the annual increase in anglers has averaged 8%. The annual increase for resident anglers has averaged 7%. The annual increase in nonresident anglers has averaged 11%.

Of the 1,866,837 angler-days fished in 1984, 1,341,658 (72%) were expended in the Southcentral region of Alaska, 326,138 (17%) were expended in the Southeast region, and 199,041 (11%) were expended in the Arctic-Yukon-Kuskokwim region. The Cook Inlet area had 1,109,727 days (59%) of the State's total sport fishing. The Kenai Peninsula had 668,161 angler-days or 36% of the State total. The Kenai River alone had 270,422 angler-days, 14% of the State total. An estimated 611,141 days, 33% of all sport fishing, was in saltwater; 1,255,696, 67% of all sport fishing was in freshwater.

The 3,150,795 fish harvested in 1984 included 1,197,475 razor clams and 408,323 smelt. Of the remaining 1,544,997 harvested fish 625,846 (41%) were sea-run salmon, 192,387 (12%) were Dolly Varden and Arctic char, 182,336 (12%) were rainbow trout, and 147,348 (10%) were Arctic grayling. Also harvested were 124,970 halibut, 80,724 rockfish, 50,862 landlocked salmon, 19,536 cutthroat trout, 19,164 burbot, 18,641 northern pike, 16,925 lake trout, 16,719 whitefish, 6,539 steelhead, 3,947 sheefish, and 636 brook trout. Chinook salmon, coho salmon, chum salmon, steelhead, rainbow trout, burbot, sheefish, smelt, halibut, and razor clam harvests were all-time record highs.

Except for razor clams, shell fisheries are not included in the 3,150,795 total fish harvest reported above. For the Kenai Peninsula, however, these fisheries were surveyed for king crab, dungeness crab, tanner crab, shrimp, and hardshell clams. Harvest and effort for these species are reported in Table 55.

The 1984 total sea-run salmon harvest of 625,846 included 85,010 chinook, 238,536 coho, 124,443 sockeye, 153,841 pink, and 24,016 chum salmon. The marine harvest total of 202,541 included 29,773 chinook, 76,786 coho, 11,787 sockeye, 75,214 pink, and 8,981 chum salmon. The freshwater total of 423,305 included 55,237 chinook, 161,750 coho, 112,656 sockeye, 78,627 pink, and 15,035 chum salmon. Regionally, 135,690 sea-run salmon were harvested in Southeast Alaska, 463,665 in Southcentral, and 26,491 in the Arctic-Yukon-Kuskokwim. The sport harvest of small chinook salmon state-wide totaled 11,897 and is included in the 85,010 reported above.

Harvest and effort for 1984 are tabulated by region, area, fishery, and species in Appendix A. Detailed tabulations for 1977 through 1983 may be found in Mills (1979, 1980, 1981a, 1981b, 1982, 1983, 1984).

Discussion

Over the past eight years the statewide sport fish harvest program has proved effectual in economically meeting management needs for reliable estimates of effort for and harvest of Alaska's game fishes. The program has been well received by the angling public: overall response to initial delivery has averaged 67%. In addition, results have been consistent with creel censuses and sport fish biologists report that harvest program estimates for areas not creel censused are in accordance with their own knowledge and observations.

Thus, in the interest of economic efficiency, the statewide harvest program has replaced on-site creel censuses in several cases where creel censuses were not required for protective in-season management or ensuring compliance with regulatory and management policies, quotas and guidelines. It is planned that a survey similar to this year's will be undertaken in 1985.

APPENDIX B
QUESTIONNAIRE AND REMINDERS

ALASKA DEPARTMENT OF FISH AND GAME

SPORT FISH SURVEY

Dear Alaska Sport Fisherman:

As the State of Alaska grows in population, pressure on its fishery resources is increasing rapidly. This survey is conducted annually by the Sport Fish Division of the Alaska Department of Fish and Game. It is designed to help the Department obtain the best possible information necessary to maintain and improve the quality of sport fishing in Alaska.

I would very much appreciate your taking a few minutes to answer the questions attached to this letter. Although there are quite a number of pages, the questions are straightforward and you need only respond to those pertaining to the areas where you sport fished. Be assured that your responses will be considered confidential.

It is my hope that you recognize this survey as a means by which you can participate in decisions concerning this State's fishery resources. We need your input. Only when we know your needs can we respond to them.

Sincerely,

Don W. Collinworth
Commissioner

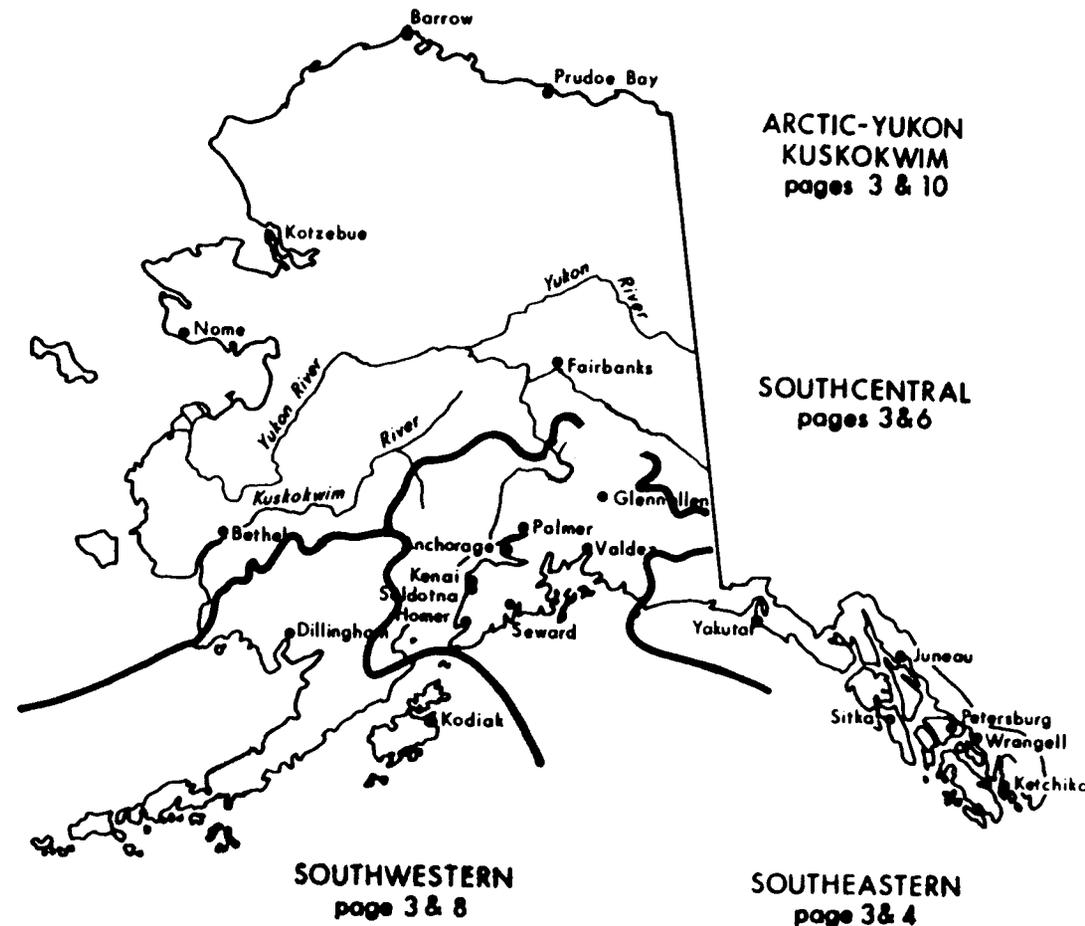

INSTRUCTIONS:

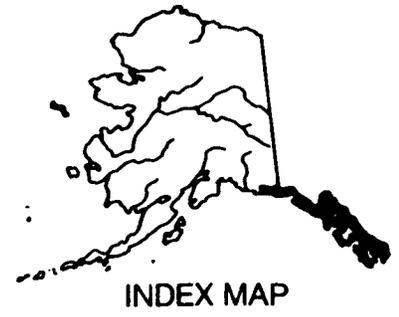

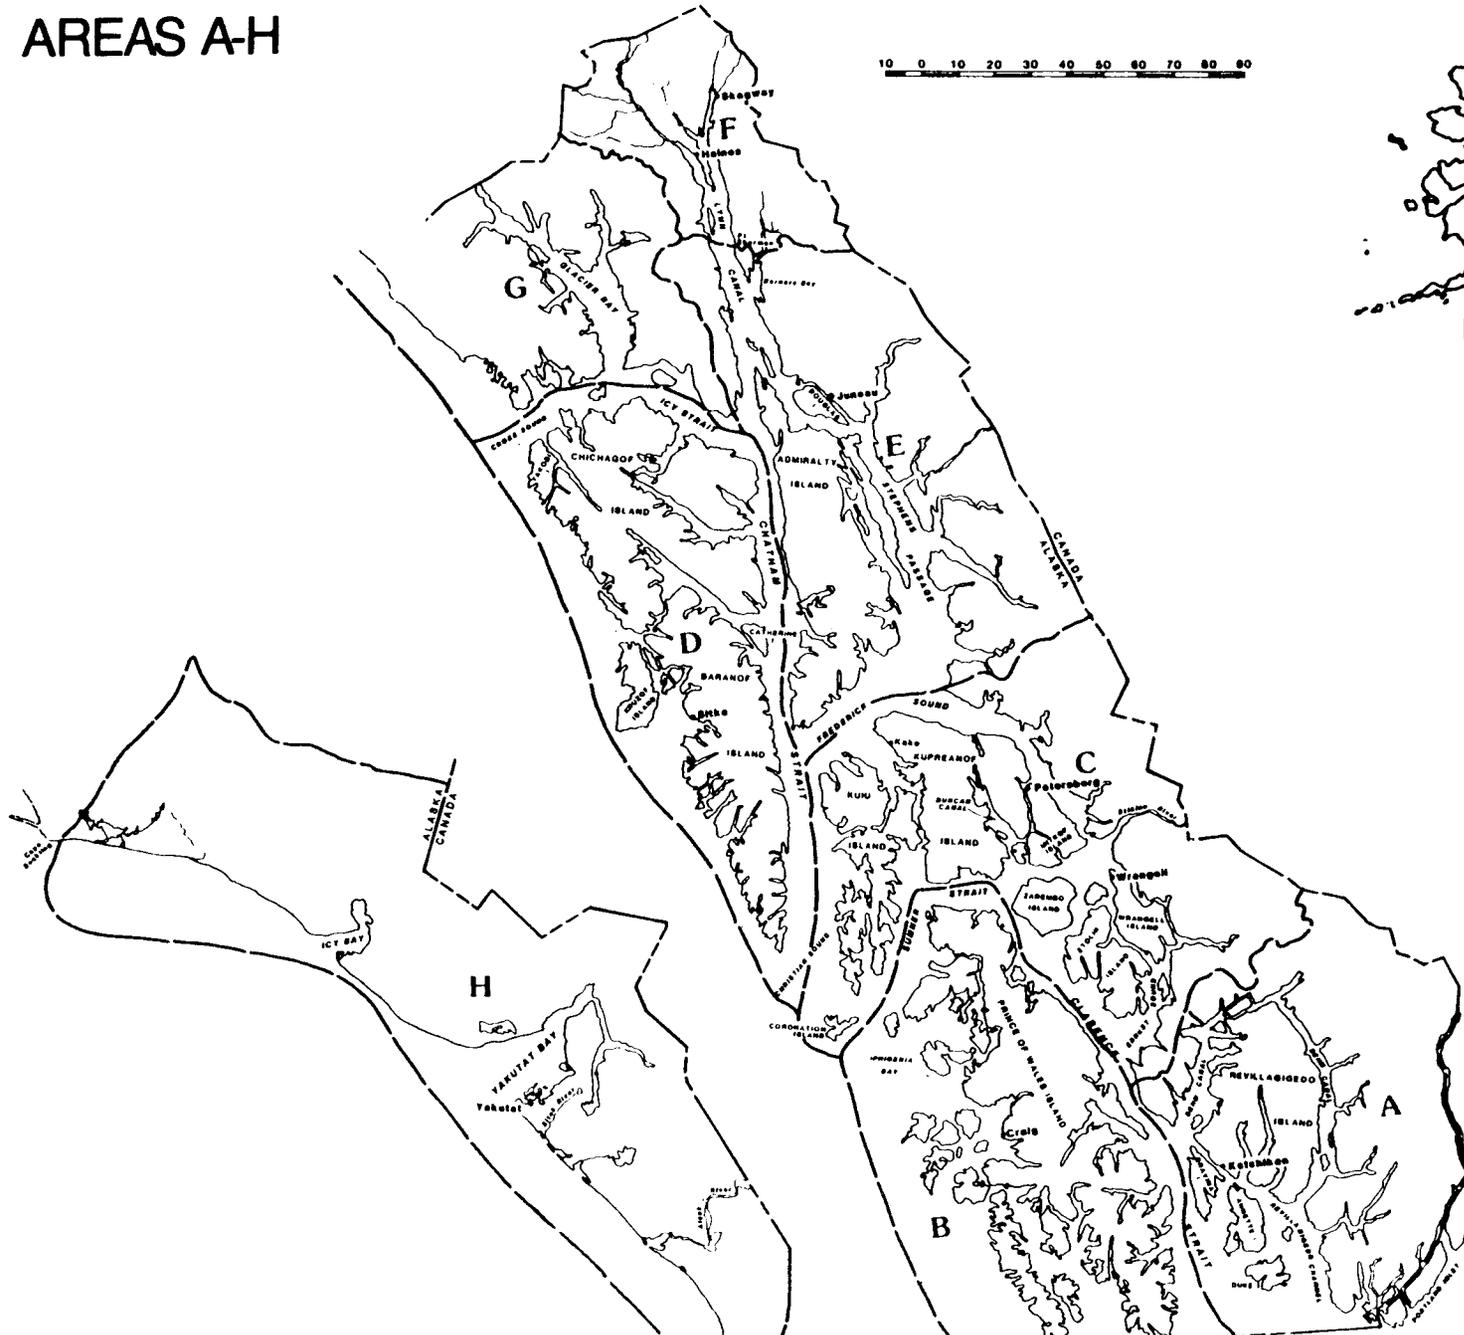

1. Questions in this survey apply to that period from January 1 to December 31 of 1984.
2. Questions apply to all members of your household, that is, everyone living at your place of residence including yourself but **not** including visiting friends and relatives.
3. If more than one member of your household received a copy of this questionnaire, you need to fill out only one questionnaire, but to avoid repeated mailing, please return all.
4. Please answer the general questions on page 3.
5. If you or any members of your household **sport** fished during 1984, please fill out the remaining pages which cover the areas **sport** fished. The maps on pages 2, 4, 6, 8 and 10 will help you find the pages which deal with those areas. If no member of your household **sport** fished during 1984, please return your questionnaire in the enclosed postage-paid envelope after answering the questions on page 3.
6. If you cannot remember exactly how much **sport** fishing was done or how many fish were caught, please estimate as closely as you can. Do not count commercially-caught or subsistence-caught fish. Include personal use dipnet-caught fish and fish caught during 1984.
7. Please return your completed questionnaire in the enclosed postage-paid envelope.

Thanks for helping us help you.

Use the map below to locate the booklet pages that apply to your household's 1984 sport fishing.

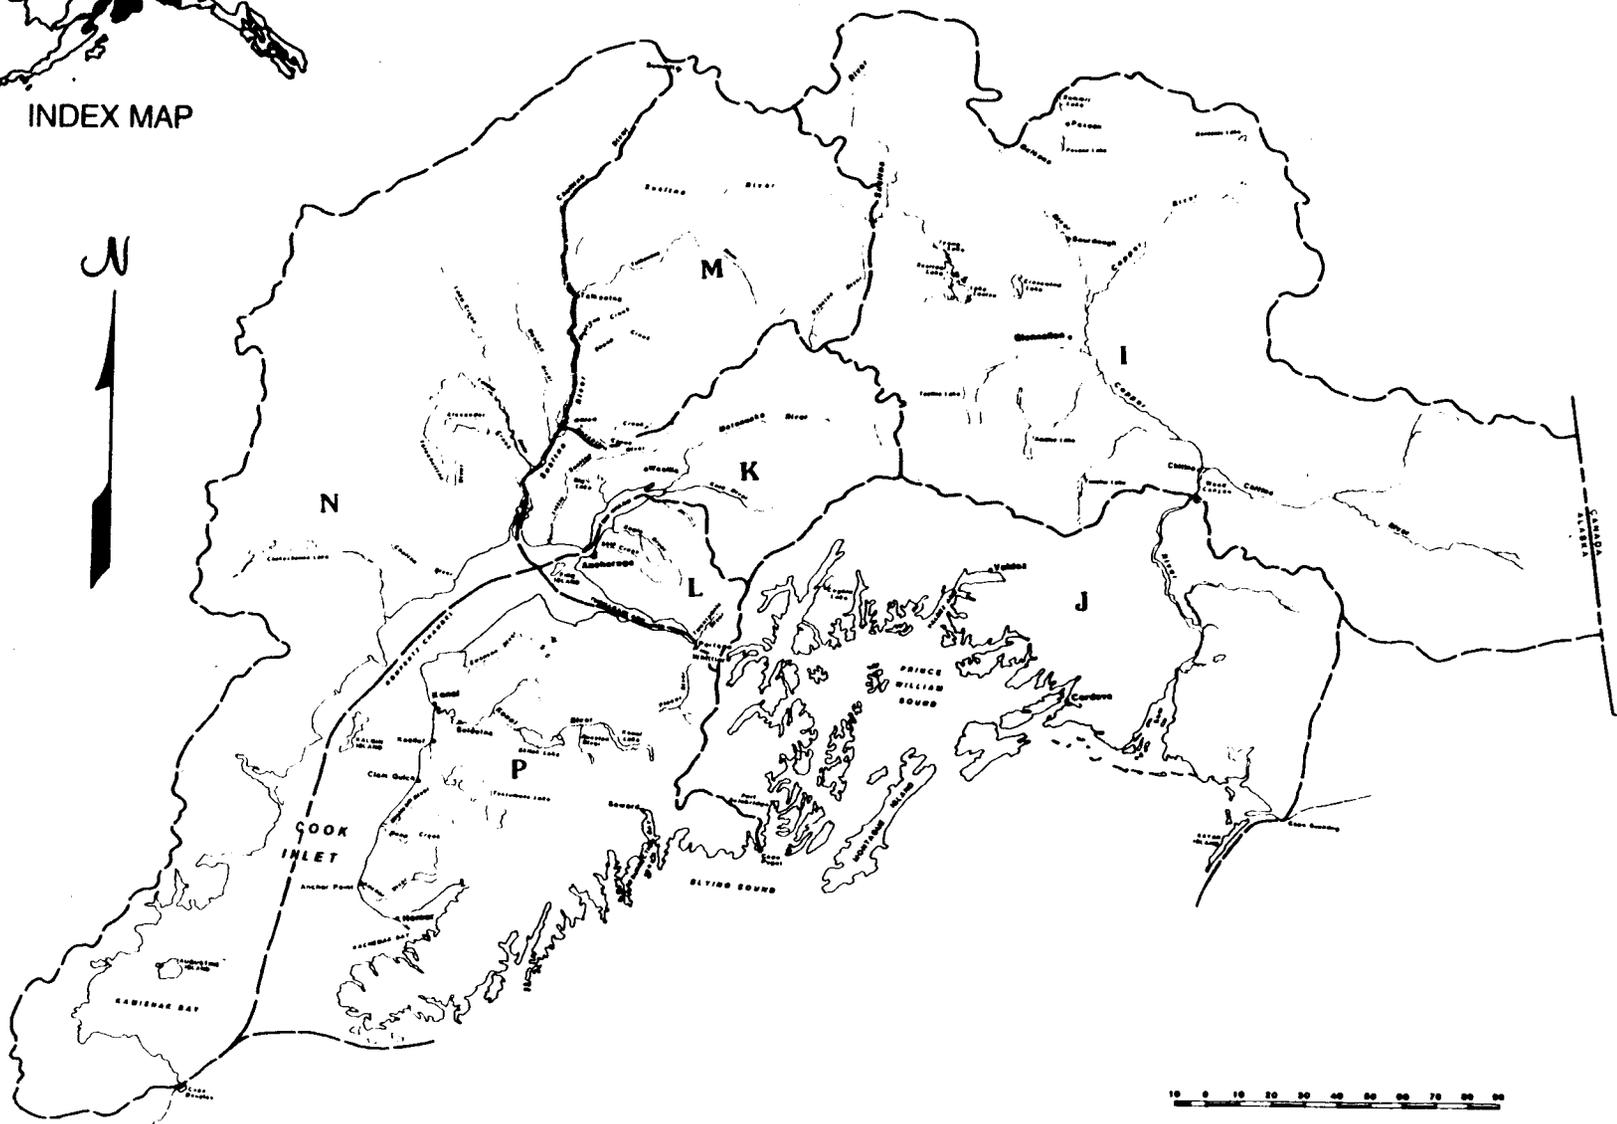

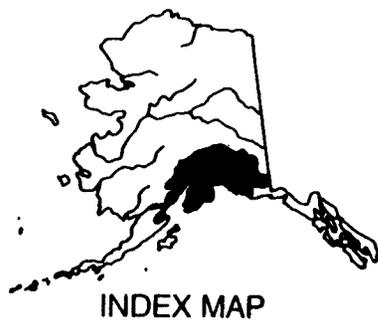

AREAS A-H

SOUTHEASTERN ALASKA SPORT FISH SURVEY AREAS

	DESCRIPTION	PAGE
A. KETCHIKAN AREA	All Alaska waters and drainages of the Unuk River and East Behm Canal south to the Proposed International Boundary line and east of a line bisecting Clarence Strait to the Canadian border. This area includes Duke, Annette, Revillagigedo, Gravina islands, and others. FISHING SITES: East and West Behm Canals, Clarence Strait, Revillagigedo Channel, Tongass Narrows, Yes Bay, Bell Island, Naha River, Ward Cove Creek, and others.	12
B. PRINCE OF WALES AREA	All Alaska marine and fresh waters west of a line bisecting Clarence Strait and north of the Proposed International Boundary to a line bisecting Sumner Strait (including Forester Island in the south and Warren Island in the north). FISHING SITES: Karta and Klawock rivers, Nossuk and Shaheen creeks, Sweetwater-Thorne system, and others.	13
C. KAKE, PETERSBURG, WRANGELL, STIKINE AREA	All Alaska waters, including freshwater drainages, bounded by a line from Ernest Sound east through Bradfield Canal to the Canadian border and north along a line bisecting Clarence Strait to Sumner Strait, bisecting Sumner Strait and turning south to, and including, Coronation Island. This area is bounded on the north by a line from the Canadian border west through Cape Fanshaw and bisecting Frederick Sound before ending at the Sitka Borough boundary in Chatham Strait. The Sitka Borough boundary extended south to Coronation Island forms the western boundary; the Canadian border forms the eastern boundary. Islands in this area include, but are not limited to, Etolin, Deer, Onslow, Sumner, Wrangell, Zarembo, Kupreanof, Mitkof, Farm, Kuiu, and Coronation. FISHING SITES: Blind Slough/Wrangell Narrows; Duncan Saltchuck/Duncan Canal; Grays Pass; Castle River; Anan, Petersburg, and Kadake creeks; and others.	14
D. SITKA AREA	All Alaska marine and fresh waters within the Sitka Borough boundary and north to a line following the Glacier Bay National Monument boundary in Cross Sound and bisecting Icy Strait. Islands in this area include, but are not limited to, Baranof, Kruzof, Catherine, Chichagof, Inian, Lemesurier, and Yakobi. FISHING SITES: Starrigavan Bay, Goulding River and Lakes, Mud Bay Creek, Plotnikof/Rezanof system, Pavlov Harbor system, Lake Eva, and others.	15
E. JUNEAU AREA	All Alaska marine and fresh waters bounded on the south by a line from the Canadian border west through Cape Fanshaw to the Sitka Borough boundary in Chatham Strait; on the east by the Canadian border; on the north by, and including, the Endicott River and Anther River watersheds (joined by a line through the Lynn Canal and Point Sherman to the Canadian border); and on the west by all east-side drainages of the Lynn Canal and a line bisecting Chatham Strait south from Pt. Couverden to Frederick Sound. This area includes all of Admiralty Island. FISHING SITES: Doty Cove to Berners Bay and west to Point Retreat; Dupont to Echo Cove and Douglas Island; Mitchell Bay Salt Lagoon; Salmon Creek Reservoir; Hasselberg, Florence, Turner, and Peterson lakes; and others.	16
F. HAINES-SKAGWAY AREA	All Alaska marine and fresh waters north of a line from the Canadian border east through Pt. Sherman and the Lynn Canal to the western boundary of Glacier Bay National Monument and north and east of this National Monument boundary to the Canadian border. This area does not include Pt. Sherman. FISHING SITES: Chilkoot River, Chilkoot Lake, and others.	17
G. GLACIER BAY AREA	All marine and fresh waters within the Glacier Bay National Monument boundaries, all east-side drainages of Excursion Inlet and Icy Strait to Pt. Couverden, and that area south of the monument and north of a line bisecting Icy Strait. This includes, but is not limited to, Rocky, Ansley, Entrance, Porpoise, and Pleasant islands, The Sisters, and the town of Gustavus.	18
H. YAKUTAT AREA	All Gulf of Alaska drainages from Cape Fairweather north to, but not including, Cape Suckling. This area includes associated salt water and is bounded inland by the Canadian border and the Bagley Icefield. FISHING SITES: Sitka River and others.	19

AREAS I-P

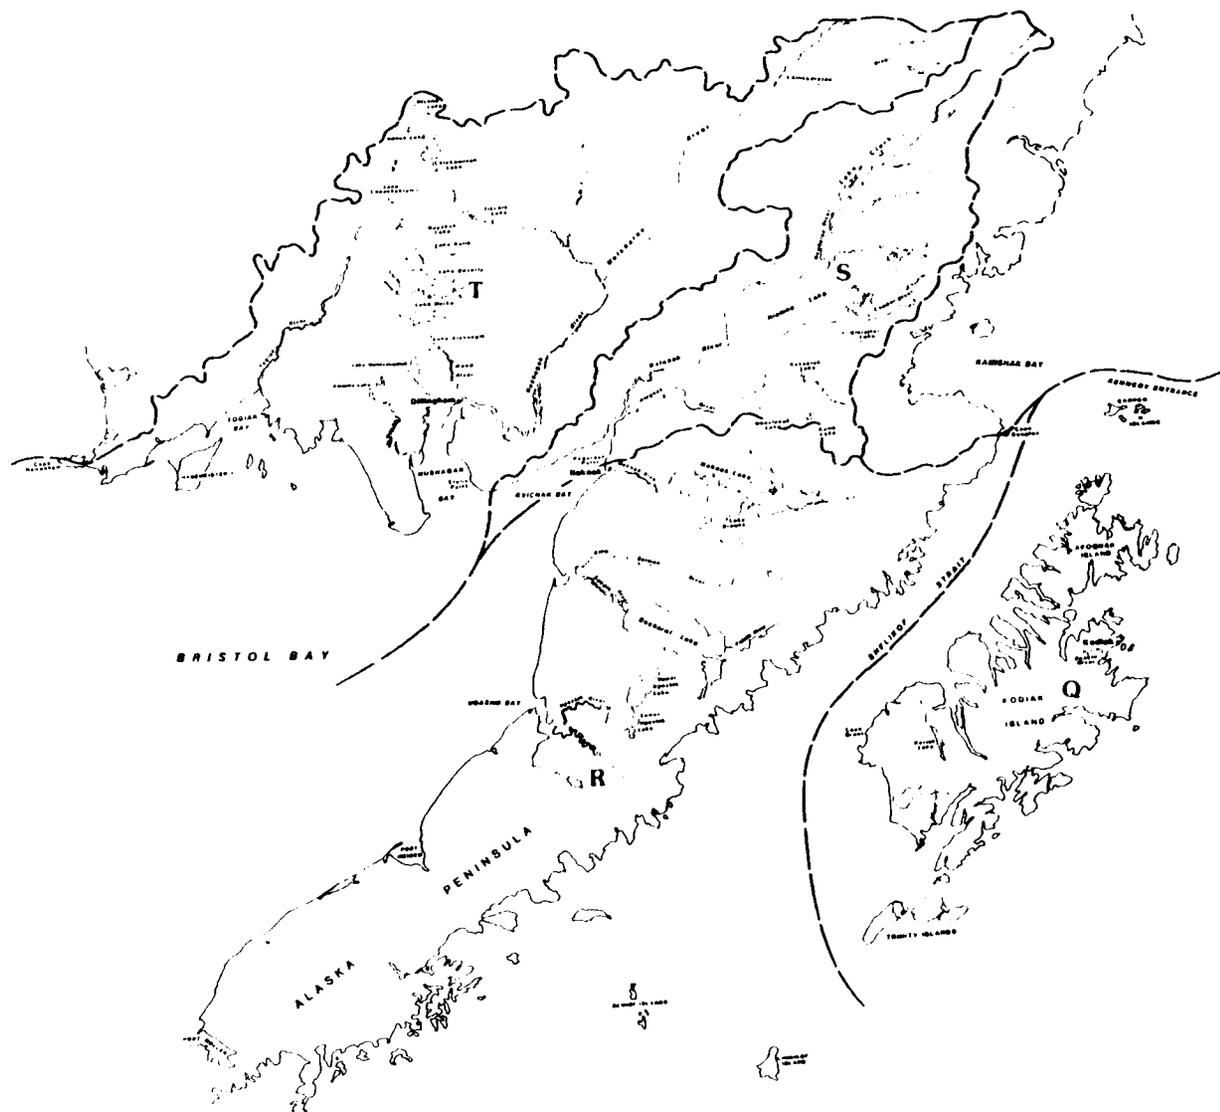

SOUTHCENTRAL ALASKA SPORT FISH SURVEY AREAS

	DESCRIPTION	PAGE(S)
I. GLENNALLEN AREA	All waters and tributaries of the Copper River upstream from a line between the south bank of Haley Creek and the south bank of Canyon Creek in Wood Canyon; also includes the upper Susitna River drainage from its confluence with the Oshetna River. Does not include the Oshetna River. FISHING SITES: Crosswind, Tyone, Van, Paxson, Summit, Strelna, Sculpin, Hudson, and Susitna lakes, Lake Louise, Gulkana River, and others.	21
J. PRINCE WILLIAM SOUND AREA	All saltwater and freshwater drainages from Cape Suckling on the east through Prince William Sound to Cape Puget (including Cape Suckling, as well as waters emptying into Port Bainbridge). Also included is that portion of the Copper River drainage downstream of a line between the south bank of Haley Creek and the south bank of Canyon Creek in Wood Canyon. FISHING SITES: Valdez Bay; Passage Canal (Whittier); Eshamy and Shrode creeks; Eyak, Coghill, and Pignot rivers; Eshamy and Shrode lakes; and others.	22
K. KNIK ARM DRAINAGE AREA	All watersheds of the Matanuska River, Knik River, and Little Susitna River, as well as east-side drainages of the Susitna River from Cook Inlet north to, but not including, the Willow Creek drainage. Also Knik Arm west of the Anchorage municipal boundary and its drainages, including the Nancy Lake Recreation Area. Includes fish caught from the east bank of this portion of the Susitna River. FISHING SITES: Fish Creek area; Wasilla, Cottonwood, and Jim creeks; Wasilla, Finger, Lucille, Nancy and Big lakes; Kepler Lake complex; Eklutna power plant raceway; and others.	23
L. ANCHORAGE AREA	All marine and fresh waters bounded by the Eklutna River drainage on the north, Knik Arm on the west, Turnagain Arm to and including the Portage Creek drainage on the south, and the Chugach Mountains on the east. Included in this area are boundary streams, that part of Knik Arm east of the Anchorage municipal boundary, and that part of Turnagain Arm north of the Anchorage municipal boundary. FISHING SITES: Ship, Bird, and Campbell creeks; Twentymile and Eagle rivers; Jewel, Campbell Point, Sand, Lower Fire, Mirror, Otter, Clunie, Gwen, Sixmile, Green, Hillberg, Triangle, C Street, Beach, Fish, and Cheny lakes; and others.	24-25
M. EAST-SIDE SUSITNA DRAINAGE AREA	All drainages of the Susitna River from its confluence with the Oshetna River downstream to its confluence with the Chulitna River near Talkeetna and including the Oshetna River drainage; all east-side drainages of the Susitna River from Talkeetna to, and including, Willow and Deception creeks on the south; and all east-side drainages of the Middle Fork of the Chulitna River, from near Summit to near Talkeetna. This includes all fish caught while fishing from the east bank of the Susitna and Chulitna rivers from Willow Creek north to near Summit. FISHING SITES: Summit Lake, Broad Pass Lakes, and other small lakes in the Summit area; and Willow, Deception, Caswell, Montana, Sunshine, Clear (Chunilna), Sheep, and Little Willow creeks.	26
N. WEST-SIDE COOK INLET — WEST-SIDE SUSITNA DRAINAGE AREA	All west-side drainages of the Susitna River, from its confluence with the Chulitna River near Talkeetna to Cook Inlet; all west-side drainages of the Chulitna River from Summit to its confluence with the Susitna, near Talkeetna; and all drainages emptying into Cook Inlet from the Susitna River to Cape Douglas and including Kamishak Bay and other associated salt water. FISHING SITES: Deshka, Talachulitna, Chuitna, Theodore, and Lewis rivers; Alexander, Polly, and Lake creeks; Shell and Judd lakes; and others.	27
P. KENAI PENINSULA AREA	All fresh water and associated salt water of the Kenai Peninsula bounded on the north by Turnagain Arm and including the Placer River drainage; on the west by Cook Inlet and including Kalgin Island; and on the east by the Placer River drainage, Kenai Lake watershed, and waters flowing into the Gulf of Alaska west of Port Bainbridge (includes Resurrection Bay). FISHING SITES: Kenai, Anchor, Ninilchik, Russian, and Kasilof rivers; Deep and Stariski creeks; Hidden Lake; Swanson River and Swan Lake Canoe system; and others.	28-30

AREAS Q-T

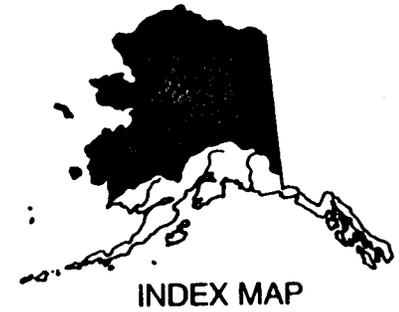

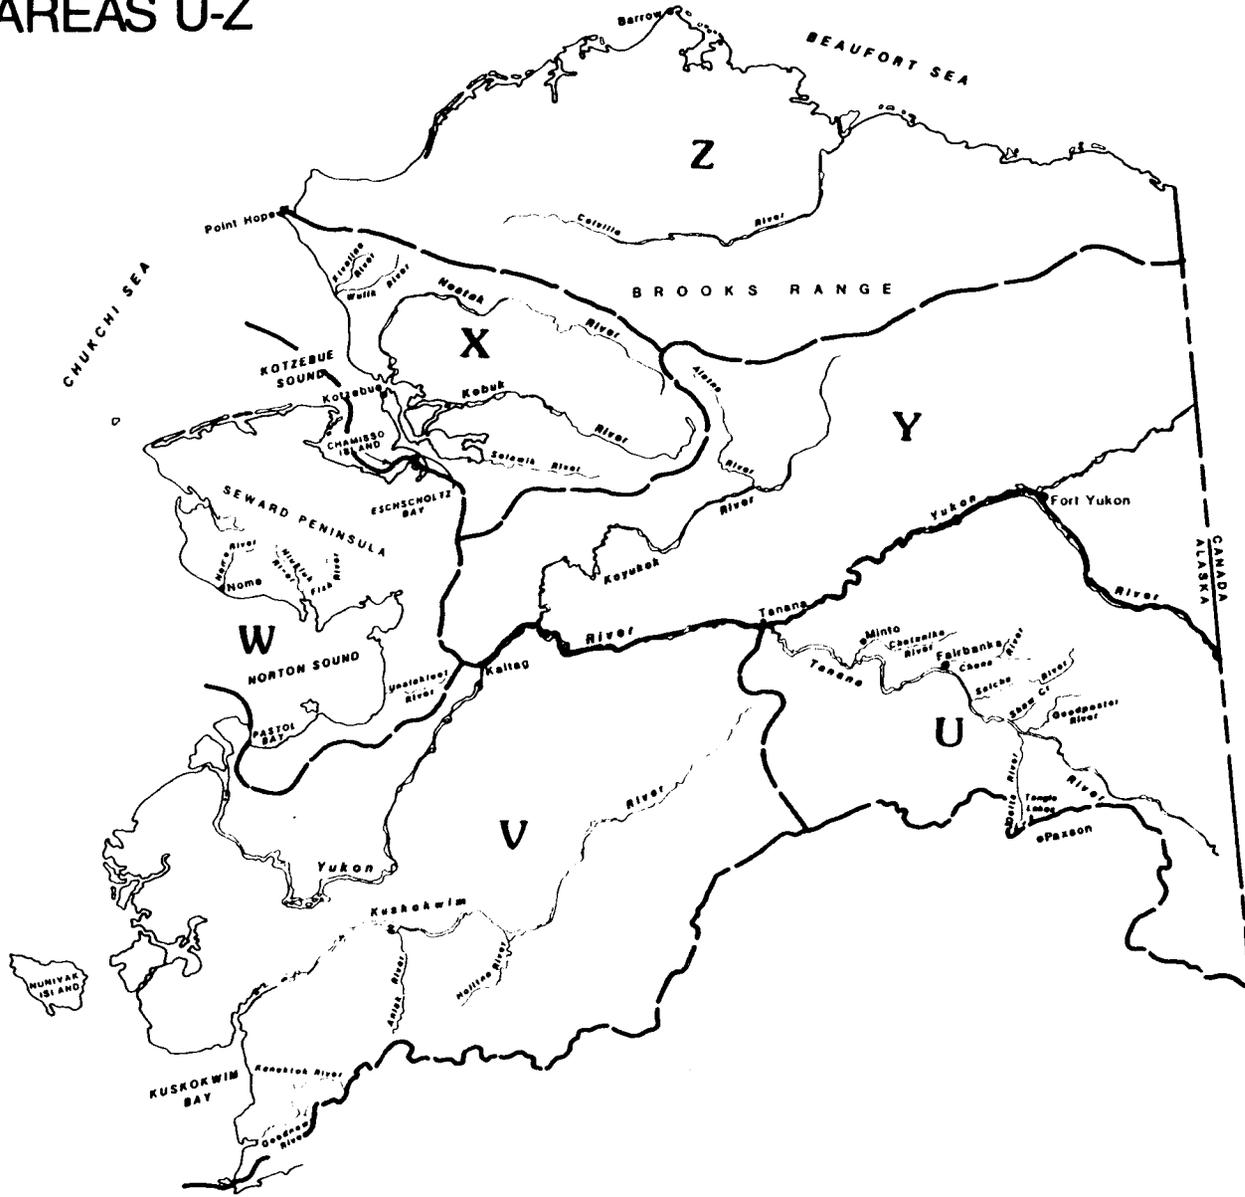

INDEX MAP

SOUTHWESTERN ALASKA SPORT FISH SURVEY AREAS

	DESCRIPTION	PAGE
Q. KODIAK AREA	All marine and fresh waters within the Kodiak Island Borough boundary. This includes Afognak Island and the Barren Islands in the north and the Trinity Islands in the south. FISHING SITES: Buskin and Pasagshak rivers, Karluk River, Lake, and Lagoon; and others.	32
R. NAKNEK DRAINAGES — ALASKA PENINSULA AREA	All freshwater drainages of the Alaska Peninsula and the Aleutian Chain south of Cape Douglas and the Naknek River watershed. Boundary waters are included as well as adjacent salt water and islands. FISHING SITES: Russel Creek (Cold Bay Area), Adak Island Area, Naknek River and Lake, Brooks River and Lake, Ugashik system, Becharof system, and others.	33
S. KVICHAK RIVER DRAINAGE AREA	All waters and tributaries of the Kvichak River watershed, including Nonvianuk Lake, Kukaklek Lake, Kulik Lake, Lake Iliamna, and Lake Clark. Also includes Kvichak Bay north of Naknek. FISHING SITES: Lower Talarik Creek; Copper, Newhalen, and Alagnak rivers; Gibraltar system; and others.	34
T. NUSHAGAK AREA	All waters and tributaries of the Nushagak River watershed, including the Mulchatna River drainage, the Wood River and Tikchik Lakes systems and waters westward to Cape Newenham. Includes adjacent salt water. FISHING SITES: Togiak River system, Chilikadrotna River, and others.	35

AREAS U-Z

ARCTIC-YUKON-KUSKOKWIM SPORT FISH SURVEY AREAS

	DESCRIPTION	PAGE(S)
U. FAIRBANKS AREA	All southern drainages of the Yukon River from its confluence with the Tanana River, near Tanana, east to the Canadian border and including the Alaskan portion of the Fortymile and Sixtymile river drainages as well as the entire Tanana River watershed. This area also includes the Alaskan portion of the White River drainage. FISHING SITES: Chena, Chatanika, Saicha, Delta Clearwater, Richardson Clearwater, Goodpaster, and Delta rivers; Shaw Creek; Badger Slough; Birch, Quartz, George, Volkmar, Fielding, Tangle, and Chena lakes; Minto Flats; and others.	36-37
V. LOWER YUKON-KUSKOKWIM AREA	All southern drainages of the Yukon River from its confluence with the Tanana River, near Tanana, west to Kaltag; all drainages of the Yukon River south of Kaltag to the Bering Sea; the Kuskokwim River watershed; all waters flowing into Kuskokwim Bay; and adjacent salt water and islands. This area does not include the Pastolik River drainage and waters flowing into Norton Sound northeast of the Pastolik River, nor any portion of the Tanana River watershed. FISHING SITES: Kanektok, Goodnews, Aniak, and Holitna rivers, and others.	39
W. SEWARD PENINSULA-NORTON SOUND AREA	All waters north of the Yukon River drainage, south of the Selawik River-Kotzebue Sound area, and west of the Yukon-Koyukuk river drainages. This area includes Pastol Bay and all salt water north and west of it in Norton Sound as well as salt water adjacent to the Seward Peninsula, including Spafariel Bay in Kotzebue Sound and the southern half of Eschscholtz Bay. FISHING SITES: Unalakleet, Pilgrim, and Nome rivers; Fish-Niukluk river system; and others.	40
X. NORTHWEST ALASKA AREA	All waters and drainages of the Kotzebue area including drainages of the Selawik, Kobuk, Noatak, Wulik, and Kivalina rivers. All salt water in the northern half of Eschscholtz Bay, including Chamisso Island area, and the northern half of Kotzebue Sound to and including Point Hope.	41
Y. SOUTH SLOPE BROOKS RANGE AREA	All drainages south of the Brooks Range, west of and including the Koyukuk and Alatna river drainages, and north of the Yukon River, including all northern tributaries of the Yukon River from Kaltag to the Canadian border.	42
Z. NORTH SLOPE BROOKS RANGE AREA	All drainages north of the Brooks Range flowing into the Beaufort and Chukchi Seas, east of Point Hope and west of the Canadian border, including adjacent saltwater areas.	43

A

A. KETCHIKAN AREA: All waters of Alaska, including drainages, from Portland Inlet to, but not including, Ernest Sound; including Duke, Annette, and Gravin Islands.

1. Write the total number of **anglers**, the total number of **trips**, and the total number of **days** spent sport fishing. *In the example, a man and his son sport fished on two trips. On the first trip the man fished 5 days (count any part of a day as one whole day) and his son fished 3 of those days; on the second trip the man and his son each fished 2 days. Thus "anglers" = 2, "trips" = 2, and, "days" = 12 (5 + 3 + 2 + 2).
2. For each variety of fish, write the number caught and kept. *In the example, 2 silver and 1 pink were caught and kept by that household. (Please note that many fish are called by different names: smelt = hooligan, eulachon, capelin, surf smelt; king = chinook; silver = coho; red = sockeye; pink = humpback; chum = dog; rockfish = any of the several species of fish commonly known as sea bass)

	No. of Anglers	No. of Trips	Days Fished	King Under 28"	King Over 28"	Silver Salmon	Red Salmon	Kokane Salmon	Pink Salmon	Chum Salmon	Halibut	Steel-head Trout	Rainbow Trout	Cut-throat Trout	Brook Trout	Dolly Varden	Arctic Grayling	Smelt	Rockfish	Other

I

1. GLENNALLEN AREA: AN Alaskan waters, including drainages of the Copper River upstream from a line between the south bank of Haley Creek and the south bank of Canyon Creek in Wood Canyon, and the Upper Susitna River drainage below its confluence with the Oshetna River. Does not include Oshetna River drainage.

1 Write the total number of anglers, the total number of trips, and the total number of days spent sport fishing. In the example, a man and his son sport fished on two trips. On the first trip the man fished 5 days (count any part of a day as one whole day) and his son fished 3 of those days, on the second trip the man and his son each fished 2 days. Thus "anglers" = 2, "trips" = 2, and, "days" = 12 (5 + 3 + 2 + 2)

2 For each variety of fish, write the number caught and kept. In the example, 2 lake trout and 2 burbot were caught and kept by that household. (Please note that many fish are called by different names: king - chinook, silver - coho, red - sockeye)

	No. of Anglers	No. of Trips	Days Fished	King Salmon	Sea-run Silver Salmon	Land-locked Salmon	Red Salmon	Rainbow Trout	Lake Trout	Steel-head Trout	Dolly V. Arctic Char	Arctic Grayling	Whitefish	Burbot	Other

FRESHWATER

P. KENAI PENINSULA AREA FRESHWATER — IN PART: All main channel waters of the Kenai River downstream of Kenai Lake to Cook Inlet. Does not include Kenai Lake, Skilak Lake or any saltwater.

NOTE: Please write your responses to instructions 1 and 2 below in the appropriate section, depending on whether your trip was non-guided or guided. Include only those trips under "guided" for which your household paid money to persons specifically in the business of guiding fishermen on the Kenai River.

1 Write the total number of anglers, the total number of trips, and the total number of days spent sport fishing. In the example, a man and his son sport fished on two trips. On the first trip the man fished 5 days (count any part of a day as one whole day) and his son fished 3 of those days, on the second trip the man and his son each fished 2 days. Thus "anglers" = 2, "trips" = 2, and, "days" = 12 (5 + 3 + 2)

2 For each variety of fish write the number caught and the number kept. In the example, 4 king were caught, but only 2 were kept by that household on a non-guided trip (Please note that many fish are called by different names: smelt - hooligan, eulachon, capelin, surf smelt, king - chinook, silver - coho, red - sockeye, pink - humpback, chum - dog)

NON-GUIDED

	No. of Anglers	No. of Trips	Days Fished	Sea-run King Under 20"	Sea-run King Over 20"	Sea-run Silver Salmon	Red Salmon	Pink Salmon	Chum Salmon	Rainbow Trout	Dolly V. Arctic Char	Lake Trout	Arctic Grayling	Smelt	Whitefish	Other

U

U. FAIRBANKS AREA: All southern drainages of the Yukon River from its confluence with the Tanana River, near Tanana, to the Canadian border; including the entire Tanana River drainage, and the Alaskan portion of the White River drainage.

1. Write the total number of anglers, the total number of trips, and the total number of days spent sport fishing. *In the example, a man and his son sport fished on two trips. On the first trip the man fished 5 days (count any part of a day as one whole day) and his son fished 3 of those days; on the second trip the man and his son each fished 2 days. Thus "anglers" = 2; "trips" = 2; and, "days" = 12 (5 + 3 + 2 + 2).

2. For each variety of fish, write the number caught and kept. *In the example, 2 king were caught and kept, and 1 landlocked salmon was caught and kept by that household. (Please note that many fish are called by different names: king = chinook; silver = coho; red = sockeye; pink = humpback; chum = dog)

	No. of Anglers	No. of Trips	Days Fished	King Salmon	Soo-run Silver Salmon	Land-locked Salmon	Red Salmon	Pink Salmon	Chum Salmon	Rainbow Trout	Dolly V. Arctic Char	Lake Trout	Arctic Grayling	Northern Pike	Whitefish	Barbot	Shoefish	Other

ALASKA DEPARTMENT OF FISH AND GAME

SPORT FISH SURVEY

Dear Alaska Sport Fisherman:

Some time has passed since we first requested information about your fishing activities in Alaska in 1984. We still have not received your reply.

You were selected as part of a representative sample of Alaskan anglers and, as such, we urgently need your reply at the earliest possible date. If you did not fish in Alaska in 1984, we need your reply anyway. Simply answer the applicable questions and return the survey form in the enclosed postage-paid envelope.

Won't you give a few minutes of your time now to help insure future fishing enjoyment in Alaska for yourself and others?

If you have already returned your completed questionnaire, please disregard this letter and accept our sincere thanks.

Sincerely,

DICK LOGAN

Dick Logan, Director
Sport Fish Division

ALASKA DEPARTMENT OF FISH AND GAME

SPORT FISH SURVEY

Dear Alaska Sport Fisherman:

We have not yet received your completed 1984 Alaska Sport Fishing Survey form. If you have not yet returned it to us, please complete the enclosed form and return it in the postage-paid envelope that is provided for your use.

Please do not underestimate the importance of your fishing activities. You have been chosen as part of a representative sample of Alaskan sport fishermen and the information that you can provide is vital to the success of this study, and may have significant impact on the future management of Alaska's sport fish resources.

If you have already returned your questionnaire, please disregard this letter and accept our sincere thanks.

Sincerely,

DICK LOGAN

Dick Logan, Director
Sport Fish Division
